C Program Day 1 – Work Sheet

Program 1:

Write a C program to Print welcome message with name & age using variables

Hints for logic:

1. Declare variables for name and age.
2. Use printf to print message.
3. Format should be: Welcome <Name>! Your age is <Age>.

Name:

Date:

Program 2:

Write a C program to store and display your personal details (like Name, Age, Gender, and Address).

Hints for logic:

1. Declare variables for each detail.
2. Assign values to each variable.
3. Use printf to display them in a clear format.
